PROJECT

Coconut Knowledge Hub (on working)
Position : Back-End Developers , Data Developers
(Year 3, Semester 1, Semester 2)
- *The UX and UI of each webpage and link were designed to be seamless and usable.*
- *For this project, I worked on a large-scale software system designed for practical use by farmers. The website provides information and news about coconuts, including ongoing and completed activities. It also provides pest prevention methods, expert advice, and more.*

Skill: Vue ,My SQL , TypeScript

Zuma_pet Shop
Position : Front-End Developers , Tester
(Year 2, Semester 2)
- *We designed the UX and UI for each webpage and link to ensure seamless functionality. We also added product cards, filters, and a search button.*
- *This project will be an application for selling pets, pet food, accessories, and toys for each type of animal. We can log in or sign up, and the data will be stored in a firebase.*

Skill: Dart

WEB SelfStudy
Position : Front-End Developers , Tester
(Year 2, Semester 1)
- *The UX and UI of each webpage and link were designed to be functional and seamless.*
- *This project is a website that provides knowledge and enhances exam-taking experience, as well as developing the brain's ability to remember things.*

Skill: Css, HTML , Java Script , Java , Docker File

Zuma_Chabu
Position: Full-Stack Developers, Tester
(Year1, Semester 2)
